

Medical Bandages

Technical characteristics:

- Made of medical bleached gauze. 100% cotton.
- Whiteness of non-sterile bandages - not less than 80%, of sterile bandages – not less than 70%.
- Capillarity of non-sterile bandages - not less than 7 cm., of sterile bandages – not less than 6,5 cm.
- Tensile strength of sterile bandages – not less than 68 N; of non-sterile – not less than 78 N.
- Without seams, with trimmed selvage.

Sizes in our assortment: 5m x 10cm, 7m x 14cm.

Usage: for bandaging and fixating of medical dressings, swabs and other medical devices in all fields of medicine.

Marking and labeling are made in Ukrainian and comply with all requirements of standards.

The product is registered in Ukraine and allowed to use in medical practice.

Plaster of Paris Bandages

Technical characteristics:

- Excellent permeability and plasticity due to porous surface. Less loss of gypsum. Good water-proof characteristics after solidification.
- Density of supporting gauze not less than 24 g/m², of plaster - not less than 340 g/m².
- Setting time from 4 to 8 minutes.
- Time of complete solidification from 24 to 48 hours depending on size and thickness of plaster cast.

Sizes in our assortment: 10x270cm, 15x270cm, 20x27cm.

Usage: as fixing material in surgery and orthopaedy, for fixation of all type of bone fractures, orthopaedic plastic, first-aid fixation, trauma of soft tissues and joint disases.

Marking and labeling are made in Ukrainian and comply with all requirements of standards.

The product is registered in Ukraine and allowed to use in medical practice.

Medical Gauze Bleached

Technical characteristics:

- Made of 100% cotton yarn.
- Bleached with non-chlorination technology.
- Density – not less than 36 g./m².
- Capillarity - not less than 10 cm.
- Whiteness - not less than 80%.
- Can be sterilized without loss in quality.

Sizes in our assortment: 5m x 90cm, 3m x 90cm; 1000m in rolls.

Usage: for bandaging of wounds and burns; wounds tamponade during bleeding; for wounds drainage and protection from contamination after surgical operations.

Marking and labeling are made in Ukrainian and comply with all requirements of standards.

The product is registered in Ukraine and allowed to use in medical practice.

Medical Absorbent Cotton

Technical characteristics:

- Made of 100% cotton, bleached with non-chlorination technology.
- Hygroscopic property – not less than 20 g.
- Contamination – not more than 0,3%.
- Whiteness – not less than 72 %.
- Capillarity - not less than 7 cm.
- Can be sterilized without loss in quality.

In our assortment: packings of 25g, 50g, 100g; rolls or zig-zag.

Usage: as absorbent pad during medical treatment, as well as for cosmetic and hygienic purposes and everyday use.

Marking and labeling are made in Ukrainian and comply with all requirements of standards.

The product is registered in Ukraine and allowed to use in medical practice.
